

CHAIN LUBE PRO

HIGH QUALITY SYNTHETIC CHAIN SPRAY

DESCRIPTION

Is an extremely adhesive lubricant with long-lasting effect. Resistant to salt and splash water. Temperature resistance from -40 °C to +200 °C. Resistant to all weather influences, has an extreme creep capacity and guarantees a long-lasting lubrication.

CHARACTERISTICS

- Reduces power loss and wear on chain and sprockets, thanks to its unrivalled lubricating properties.
- Regular use will extend the life of all chain and sprocket components.
- Very high adhesion, even under extreme loads.
- Protection against rust and corrosion.
- Excellent penetration properties.
- Temperature range: -40 °C to +200 °C.
- Behaves neutrally towards non-metallic surfaces, such as lacquer, plastic, rubber.
- Water resistant and dirt repellent.

APPLICATION

For all standard O-ring, X-ring and Z-ring chains of motors, karts and industrial drives.

Shake well before use. Apply to the inside of the chain along its entire length. Fully adheres after a few minutes. Can be easily removed with cleaning materials.

Contents: 12 x 400 ml/carton
