

## DIRECT DPF CLEANER

### PROFESSIONAL DIESEL PARTICLE FILTER CLEANER

#### DISCRIPTION

DIRECT DPF CLEANER is a fast-acting and highly efficient cleaning product with a high concentration of active components to professionally clean the dirty (clogged) particle filter without disassembly. High replacement costs are thereby avoided.

#### CHARACTERISTICS

- Cleans and removes soot particles from the porous filter structure, which is present in the Diesel Particle Filter.
- Prevents repeated accumulation of soot particles in the Diesel Particle Filter.
- Non-flammable water-based liquid.
- Metal-free cleaning fluid that leaves no residue.
- Restores the optimal performance of the Diesel Particle Filter.
- Increases the reliability of the engine and Diesel Particle Filter.

#### APPLICATION

For troubleshooting applications where the DPF is clogged. For all types of diesel engines equipped with a Diesel Particle Filter and catalytic converter.

The contents of one aerosol is suitable for treating one particulate filter of passenger cars and light commercial vehicles with a maximum weight of 3. 500 kg. For heavier commercial vehicles it is possible that for adequate cleaning of the DPF several doses are required.

Contents: 12x 400 ml/carton
